

COMPANY PROFILE

Who is EMELEC?

Established in April 1999, EMELEC A.Ş. has a rich history spanning nearly four decades in the underground power cable accessory industry.

Our journey began with a commitment to excellence and innovation, aiming to redefine technological standards and provide groundbreaking solutions for enhanced efficiency, productivity, and sustainability. Since our inception, we have grown into one of the foremost companies in the industry, driven by a culture of relentless innovation and customer focus. EMELEC A.Ş. producing a wide range of products in-house with an unwavering commitment to quality. This dedication has earned us a reputation as a trusted partner in the underground power cable accessory sector.

Products

EMELEC A.Ş. specializes in manufacturing high-quality products tailored to meet the diverse needs of the underground cable accessories industry:

- High Voltage Link Boxes
- Middle Voltage Link Boxes
- Cable Cleats
- Filling Compound
- Middle Voltage Accessories

Services

In addition to our extensive product line, EMELEC A.Ş. offers specialized services:

- AC Site Acceptance Tests
- Partial Discharge Tests
- Consulting Services
- Maintenance and Support
- Training Programs
- Custom Solutions

Our expansive array of customers worldwide stands as a testament to the reliability and efficacy of our products. EMELEC A.Ş. Link Boxes are utilized in various regions across the globe

Our Strengths

- **Customized Solutions**

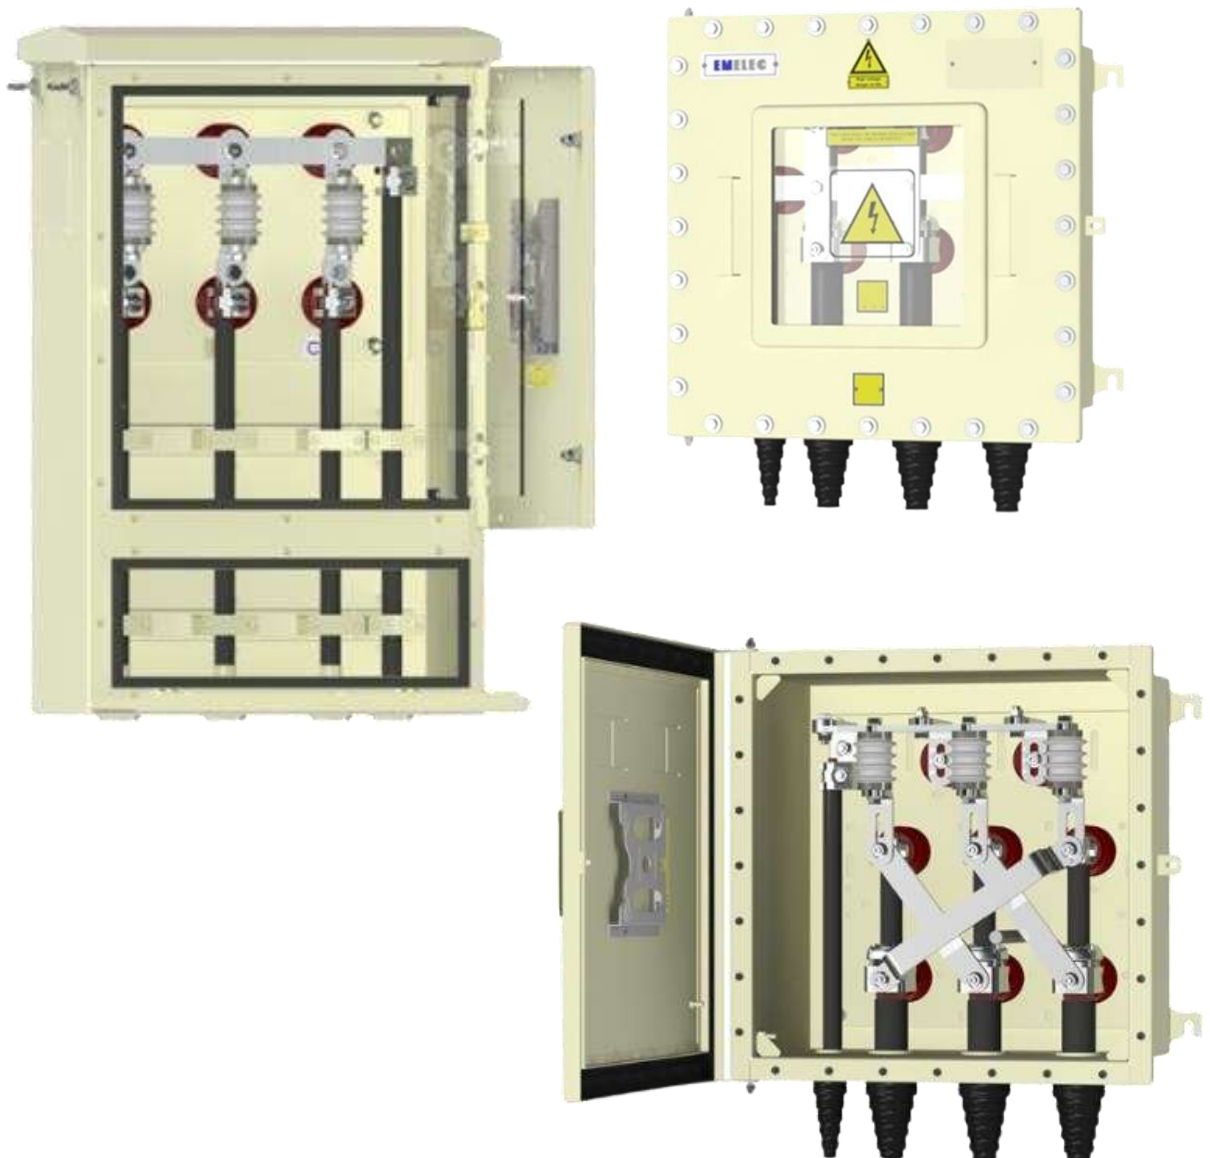

At EMELEC, we specialize in developing custom-designed Link Boxes tailored to our customers' specific needs.

Whether we are creating designs based on exact specifications or project-based requirements, we are committed to meeting our customers' evolving demands.

- **Wide Product Range**

Our main product, the Link Box, offers a diverse range of options to address any customer requirement or preference.

This extensive variety enables us to provide comprehensive solutions that cater to the diverse needs of our customers.

- **Integrated Manufacturing**

Our products benefit from patents protecting their designs and all accessories are produced in-house.

This vertical integration ensures that we maintain full control over the design and manufacturing process, guaranteeing the highest standards of quality and innovation.

- **Quality Assurance Measures**

We conduct rigorous testing to ensure the reliability, durability, and performance of our products in our test laboratory, which is **accredited according to TS EN ISO/IEC 17025:2017**.

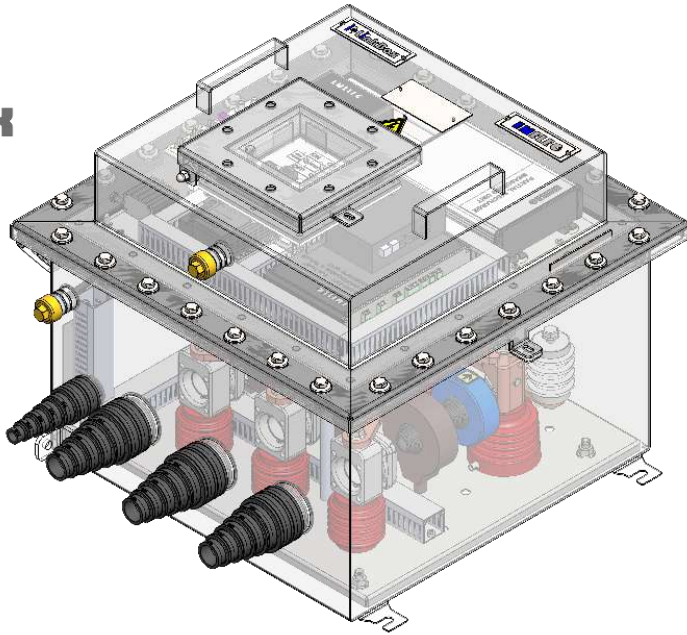

Equipped with specialized testing equipment, our dedicated testing areas allow us to uphold our commitment to delivering superior solutions to our valued customers.

Research & Development

At EMELEC A.Ş., we're committed to innovation, constantly seeking to enhance the performance and features of our products. Our research and development efforts focus on finding new solutions to meet the evolving needs of the underground cable accessories industry.

i-linkBox

One of our latest innovations is **i-LinkBox**, a groundbreaking advancement in underground power cable management. This intelligent device integrates special sensors and online alarming capabilities into traditional Link Box designs. By upgrading to i-linkboxes, underground cable systems gain enhanced monitoring and predictive maintenance capabilities. Operators receive early warnings about potential issues, enabling them to prevent downtime and maintain system efficiency. With real-time monitoring and advanced features, the i-linkbox transforms underground power cable systems into smarter, more reliable networks.

Sustainable Future

Over the years, EMELEC A.Ş. has made significant strides in enhancing sustainability within our facilities, focusing on waste reduction and promoting environmental awareness. This commitment is seamlessly integrated into our product development and installation processes, ensuring minimal environmental impact at every stage. As responsible corporate citizens, sustainability is deeply ingrained in our company values. We actively pursue sustainable manufacturing practices, conserve resources, and implement effective waste reduction initiatives. At EMELEC A.Ş., we pride ourselves on leading by example, demonstrating our unwavering dedication to environmental stewardship and corporate responsibility in all aspects of our operations.

Facilities

EMELEC A.Ş. operates two facilities, each playing a distinct role in our operations

EMELEC Facility (Free Zone Location): Serving as a vital manufacturing and dispatch hub, our EMELEC facility ensures efficient production processes and timely delivery of high-quality products to clients worldwide.

EM Facility: Dedicated exclusively to manufacturing operations, our EM facility focuses on producing our innovative standards of quality and precision in product line. With a specialized team of skilled technicians and state-of-the-art equipment, the EM facility upholds the highest Manufacturing processes. By focusing solely on manufacturing, the EM facility contributes to our commitment to delivering superior products to our customers.

Our facilities and skilled workforce work together to ensure operational excellence, product quality, and customer satisfaction.

Our mission is to continue to be a reliable business partner with the most widespread point network in the regions where we operate. We are dedicated to providing the highest quality after-sales service and being primarily preferred by the leading manufacturers and sales points in their fields.

Our vision is to continue our mission of being a reliable solution partner in the sales and distribution sector. We are committed to creating new projects and employment areas with the understanding of "new generation management."
